Sequence 9, Application US/09419568F

Patent No. 6331613

GENERAL INFORMATION:

APPLICANT: Dumoutier, Laure

APPLICANT: Louhed, Jamila

APPLICANT: Renauld, Jean-Christophe

TITLE OF INVENTION: (TIFS) The Proteins Encoded, and Uses Thereof

TITLE OF INVENTION (MBER: US/09/419,568F

CURRENT APPLICATION NUMBER: US/09/419,568F

CURRENT APPLICATION NUMBER: US/09/354,243

PRIOR APPLICATION NUMBER: US/09/354,243

PRIOR APPLICATION NUMBER: US/09/178,973

PRIOR APPLICATION NUMBER: US/09/178,973

PRIOR APPLICATION NUMBER: US/09/178,973

PRIOR FILING DATE: 1998-10-26

NUMBER OF SEQ ID NOS: 29
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          망

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             246
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            186
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          208
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            126
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  666
Sequence 25, Application US/09419568F

Sequence 25, Application US/09419568F

patent No. 6331613

GENERAL INFORMATION:

APPLICANT: Dumoutier, Laure

APPLICANT: Louned, Jamila

APPLICANT: Renauld, Jean-Christophe

APPLICANT: Renauld, Jean-Christophe

ITILE OF INVENTION: ISolated Nucleic Acid Molecules which Encode T Cell Indu

ITILE OF INVENTION: (TIFs) The Proteins Encoded, and Uses Thereof

FILE REFERENCE: LUD 5543.2

CURRENT APPLICATION NUMBER: US/09/419,568F

CURRENT FILING DATE: 1999-10-18

PRIOR APPLICATION NUMBER: US09/354,243

PRIOR FILING DATE: 199-07-16

PRIOR APPLICATION NUMBER: US09/178,973

PRIOR APPLICATION NUMBER: US09/178,973

PRIOR FILING DATE: 1998-10-26

NUMBER OF 5EQ ID NOS: 29

SEQ ID NO 25

SEQ ID NO 25

LENGTH: 4797

TYPE: DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Q
                                                                                                                                                                                                                                                                                                                   RESULT 9
